August and 5 September 1807, the British landed, assaulted and captured the city of Copenhagen before making off with the Danish fleet. The network of agents supplied strategic intelligence, giving the British army advance warning of the arrival, destinations, and likely

intentions of French reinforcements. The military network supplied operational intelligence, which confirmed the accuracy of the strategic intelligence and provided greater detail on the strengths, arms, and morale of the French forces.

Davies reveals how, by integrating these two forms of intelligence, Wellington was

able to develop an extremely accurate and reliable estimate of French movements and intentions not only in his own theater of operations but also in other theaters across the Iberian Peninsula. The reliability and accuracy of this intelligence, as Davies demonstrates, was central to Wellington's decision-making

and, ultimately, to his overall success against the French. Correcting past, incomplete accounts, this is the definitive book on Wellington's use of intelligence. As such, it contributes to a clearer, more comprehensive understanding of Wellington at war and of his place in the history of British military intelligence.

The art of power consists of getting what one wants. That is never more challenging than when a nation is at war. Britain fought a nearly nonstop war against first revolutionary then Napoleonic France from 1793 to 1815. During those twenty-two years, the British government formed,

Eventually Britain and its allies prevailed, not once but twice by vanquishing Napoleon temporarily in 1814 and definitively in 1815. French revolutionaries had created a new form of
