Abstract curricular
program
implementation in the
context of randomized
field trials Gloria
Isabel Miller This
study examined three
cases of commercially
available curricular
program
implementations to
determine if a unified
approach to
measuring the level of

Online Library

Variables

Implementation was possible (proof of concept). Further, the study investigated whether the level of curriculum and implementation plan specificity made a difference to the strength of implementation achieved in classrooms; and described the

Online Library

Variables

Implementation Partner
evolution in different
Quiz 2 Answers
contexts. The study
sample consists of a
total of 163 teachers
in eight school
districts across the
United States. In each
case teachers were
randomly assigned to
using the curricular
innovation or their
currently used
materials and

Online Library

Variables

Processes. The three cases, HS-Math, NewScience, and MathIntervention, were purposely chosen to represent three different points of curricular and implementation specificity and two different subject areas, math and science. Each case features a

Online Library Variables

Commercially Partner
Quiz 2 Answers
available program that
also had opportunities
for teachers to use
"electronic"
technology to
enhance their learning
or to engage their
students. The cases
represent differing
student grade levels.
The cases are
different enough to
provide a range that

Online Library

Variables

exercises the measurement techniques introduced in this study so results can begin to generalize across curricular programs and grades. However, the cases are similar enough in research design, instrumentation, and data collection methods to make

Online Library

Variables

them comparable. A key contribution of this investigation is the creation of a framework to measure the level of implementation (the extent to which the teacher and students display the actions, behaviors, and interactions expected by using the innovation). The

Online Library Variables

Unified conceptual framework arrived at by using an Activity Theory perspective together with the analytical methods employed provide a way to view the rich complex interaction of implementation as a system with the larger system of the school organization. Data from the analysis

Online Library Variables

revealed that variations in the level of implementation were no different regardless of the level of specificity. A strong finding of this work is that implementation evolves slowly even when the curricular program is scripted and coaching support is provided to teachers. The paper

Online Library Variables

concludes with
implications for policy
and future research.

HTML5 opens up a
plethora of new
